

Nontapat Auetrongjit

CURRICULUM VITAE

Second-year undergraduate student in Computer Engineering and Digital Technology (Sandbox), Faculty of Engineering, Chulalongkorn University. My work and learning path focus on artificial intelligence, computer vision, AIoT, data science, cybersecurity, and software systems. This CV expands the one-page resume into a chronological record of education, training, competitions, awards, projects, leadership, and technical growth.

Date of Birth: 20 November 2007

EDUCATION

2025 - PRESENT

Chulalongkorn University

B.Eng. in Computer Engineering and Digital Technology (Sandbox), Faculty of Engineering

Currently studying in an engineering program that combines computer engineering foundations with digital technology, software development, data-driven problem solving, and applied AI. My current academic direction connects algorithmic thinking, machine learning, computer vision, and practical engineering deployment.

2022 - 2024

Kasetsart University Laboratory School

Upper Secondary Level - GPA 3.94

Completed upper secondary education with strong academic performance and sustained participation in computer science, mathematics, cybersecurity, and innovation activities. Received the Academic Excellence Honor Badge, Second Place, and Certificates of Excellence in Academic Achievement and Good Conduct across 12 consecutive academic years.

2019 - 2021

Kasetsart University Laboratory School

Lower Secondary Level - GPA 3.90

2013 - 2018

Kasetsart University Laboratory School

Primary Level - GPA 3.83

2011 - 2012

Pramandanijjanukroah School

Kindergarten - Score 98%

TECHNICAL SKILLS

Programming

Python, C, C++, Java, SQL

AI and Data

Machine learning, data analysis, tabular modeling, signal processing, computer vision, LLM applications

Engineering

Git/GitHub, DevOps fundamentals, dashboard development, data pipelines, edge-focused AI deployment

Security

Cybersecurity fundamentals, CTF-style problem solving, platform security awareness

Soft Skills

Problem solving, adaptability, growth mindset, teamwork, collaboration, independent research

EXPERIENCE AND LEADERSHIP

JUN 2026 - PRESENT

AI Engineer Intern - AXONS

AXONS Eyes Team, Computer Vision

Currently developing an applied AI project for the AXONS Eyes Team, with work spanning computer-vision model evaluation, data pipelines, visual-quality analysis, and edge-focused deployment. The internship connects my academic AI and computer-vision experience with real industrial constraints and production-oriented project development.

2025 - PRESENT

DevOps & Security Member - Friday Activity Crew Club, CEDT

Contribute to DevOps and security work for CEDT Talent Journey, a student activity management platform supporting event registration, evaluations, attendance tracking, and credit equivalence. Responsibilities include improving platform security, developing administrative tools, and supporting workflows for staff to review activity information and approve credit transfer requests.

2024

Student Committee, Academic Division

Kasetsart University Laboratory School

Served as a Grade 12 student committee member in the Academic Division and acted as a liaison with the Information Technology Department, supporting academic coordination and technology-related communication within the school.

2023 - 2024

KUS Computer Technology Club Member

Participated in technology-focused workshops and collaborative activities to explore computer science fundamentals, emerging technologies, and practical development skills.

27 - 31 MAR 2023

Programmer Internship - KnowAre

Completed a short internship and presented "Dynamic Chair," a project using ESP32 as a core component for a business-oriented application. The experience introduced me to applied programming, embedded prototyping, and communicating a technical concept in a workplace setting.

AI, INFORMATICS, AND ACADEMIC PROGRAMS

APR 2026 - PRESENT

Super AI Engineer Season 6 Level 1 - 3

Organized by the Artificial Intelligence Association of Thailand (AIAT)

Progressed through AIAT's national AI engineer development pathway, beginning with more than 10,000 Level 1 applicants and qualifying into the 150-participant Level 2 cohort. Level 1 covered AIAT MOOC upskill/reskill coursework, Foundation AI (Theory), and a qualification hackathon. Level 2 combined one month of online preparation, four mini-hackathons, and a one-month onsite intensive AI bootcamp with four industry-challenge hackathons across five AI domains, while building networks with leading instructors and experts.

Level 3 focuses on real workplace experience. I was selected for a two-month AI apprenticeship at AXONS, where I am developing an applied project before returning to present the internship project and complete the program-wide evaluation.

13 - 17 MAY 2024

Thailand Olympiad in Informatics (TOI 20)

Selected as a representative of the POSN Computer Center, Satriwithaya School under the Royal Patronage - Kasetsart University, and participated in the 20th Thailand Olympiad in Informatics. The experience strengthened my algorithmic thinking, competitive programming discipline, and ability to solve complex problems under time constraints.

OCT 2023 - APR 2024

POSN Olympiad in Informatics Training

Completed POSN Computer Science training through Camp 1 and Camp 2. Camp 1 was held from 2 - 18 October 2023 at Satriwithaya Mahapruettharam School Center under the Royal Patronage, Bangkok. Camp 2 was held from 18 March - 3 April 2024 at the Faculty of Science, Kasetsart University, Bangkok.

APR - JUN 2024

AI Builders 2024 - VISTEC

Selected as one of 45 participants from over 500 applicants to join a 10-week AI training and hands-on project development program organized by Vidyasirimedhi Institute of Science and Technology (VISTEC). The program introduced me to AI project development, independent research, and applied experimentation.

2023

Thailand Mathematics Academic Camp (TMAC)

Participated in Thailand Mathematics Academic Camp activities, including the 11th TMAC from 29 April - 1 May 2023. This continued my long-term interest in mathematics and problem solving.

PROJECTS

2026

FormWings - On-Device Running-Form Analyzer

WellSense AIoT Hackathon, Super AI Engineer Season 6

Led software and model design for a 10-member team building an on-device running-form analyzer. A Nano 33 BLE with an LSM9DS1 streams raw accelerometer and gyroscope data, while the UNO Q Linux side runs an XGBoost classifier with a TFLite Transformer fallback to assess cadence, vertical oscillation, ground contact time, trunk forward lean, heel-strike likelihood, and impact loading rate.

Integrated Modulino Thermo for real-time temperature, humidity, and heat-index context, broadcast results over BLE, and visualized the analysis on a React + Vite dashboard. The project received the Academic Popular Vote award at the WellSense AIoT Hackathon.

2024

AI Classroom Behavior Detection

Developed a real-time computer-vision project that detects student behavior in classroom settings. The project grew from knowledge gained through AI Builders 2024 and required independent research across local and international references. It received a Silver Medal at the 9th Demonstration Academic Fair 2024 under the National and International Innovation Creation Project at Chulalongkorn University Demonstration School.

2024

Chat & Chill

Mental Health Hackathon 2024, KMUTT

Participated as part of the development team for an AI-powered game designed to reduce stress and support mental-health awareness. The project explored how conversational AI and game design can create a listening-oriented experience for users.

AWARDS AND HONORS

2026	Academic Popular Vote - WellSense AIoT Hackathon Received the Academic Popular Vote award for "FormWings," an on-device running-form analyzer developed during Super AI Engineer Season 6.
8 - 9 AUG 2024	Silver Medal - National and International Innovation Creation Project for the Royal Trophy Received a Silver Medal, 2,000-baht scholarship, and trophy at the 9th Demonstration Academic Fair, "Essential Soft Skills for the Future," Upper Secondary Level, held at the Faculty of Education, Chulalongkorn University, for "AI Student Behavior Detector in Classroom."
4 JUL 2024	First Runner-Up - Cyber Skills Competition for Military Cadets and High School Students Received First Runner-Up Team Award with a 10,000-baht scholarship, honorary plaque, and medals from the Royal Thai Armed Forces Headquarters.
2024	Gold Medal - Thailand Mathematics Contest (TMC), Grade 11 Received a Gold Medal in the 12th Thailand Mathematics Contest for outstanding mathematical ability.
2023	Silver Medal - Thailand Mathematics Contest (TMC), Grade 10 Received a Silver Medal in the 11th Thailand Mathematics Contest for outstanding mathematical ability.
JAN 2024	Gold Medal, 2nd Runner-Up - Computer Programming Competition (Grades 10-12) Received the award at the 71st Student Arts and Crafts Fair, Bangkok Educational Service Area Office 2, Academic Year 2023.
21 FEB 2024	Academic Excellence Honor Badge, Second Place Awarded by Kasetsart University Laboratory School to students with outstanding academic ability and exemplary conduct.
2013 - 2024	Certificates of Excellence - 12 Consecutive Academic Years Received Certificates of Excellence in Academic Achievement and Good Conduct throughout the full 12-year period from primary education through upper secondary level.

COMPETITIONS AND ACTIVITIES

2025

I-Squared Hackathon - 5th of 17 Teams

Achieved 5th place in an undergraduate-level Data Science and Machine Learning competition sponsored by Google, Gulf, and Bright Hair Studio. The team was composed entirely of first-year students.

2024

Thailand Cyber Top Talent - 12th of 283 Teams

Represented Kasetsart University Laboratory School in the national high-school cybersecurity competition. Also competed in Thailand Cyber Top Talent 2023 and placed 24th out of 272 teams.

2023 - 2024

BangMod Hackathon

Participated in C-language computer programming problem-solving competitions. In 2024, the team advanced to Round 2 and placed among the top 36 teams out of 283 teams nationwide.

2024

GEN WIT TV DEMO SS1

Represented Kasetsart University Laboratory School in producing a demo for Workpoint Channel 23's "GEN WIT TV," a quiz competition involving science, engineering, mathematics, and technology.

HOBBIES AND INTERESTS

Classical guitar, table tennis, badminton, exploring technology-related content, and staying updated on emerging trends in AI, software engineering, and digital technology.
